## Professional Summary

- 2021 graduated student from master of NTU EE with 2 years industry-academia cooperation experience in the area of Robotic Path Planning and Control actively seeks for a **Software Position** right now
- Published an article on international journal as a 1<sup>st</sup> author about constructing a system for robotic path planning
- Experienced in several electric control and computer engineering projects

## Awards & Publications

### 【Special Performance】

2019.2	Presidential Award	1 <sup>st</sup>
2018.9	Presidential Award	1 <sup>st</sup>
2018.2	Presidential Award	3 <sup>rd</sup>

### 【Certification】

2018.1 Automation Engineer  
By Taiwan Automation Intelligence and Robotics Association (TAIROA)

### 【Conference】

2020.11  
Kuo-Chun Huang, Po-Yu Lin, Jie Wang, Feng-Li Lian, “**Cyber-Physical Simulation Platforms for Generating Rich Data and Evaluating Control Tasks,**” Proceedings of the 17th International Conference on Automation Technology, Hualien, Taiwan, Nov. 2020

### 【Journal】

2021.02 (Minor Reviewing)  
Kuo-Chun Huang, Feng-Li Lian, “**A Novel Solution with Rapid Voronoi-grid based Coverage Path Planning in Complex Environment for Robotic Mowing Systems,**” International Journal of Intelligent Robotics and Applications

## Project

- PID Feedback - Table Tennis Robot (Matlab, Arduino)**  
(People:2)  
Constructed a 92% stable path and curl for athlete to practice table tennis based on GUI system  
[DETAIL>](#)
- Cyber-Physical System for Robotic Arm (C#, Unity)**  
(people:2)  
Delivered a Cyber-Physical System with 70% accuracy to control robotic arm (UARM) by Gesture Movement using Kinect Images through software interrupts between Unity and practical world  
[DETAIL>](#)
- Intelligent Rubbish (C)**  
(People:2)  
Established a Intelligent Rubbish with 95% accuracy based on STM32 Arm Cortex MCUs through software interrupts and timer  
[DETAIL>](#)
- 2D Adventure Game (C#, Unity)**  
(People:4)  
Built a 2D Adventure Game and accomplished each of API, including attack, timing, UI/UX, the motion of monsters  
[DETAIL>](#)

[More](#)

## Education

- National Taiwan University (NTU)**  
Master of Science in Electrical Engineering  
2019.9 - 2021.8  
GPA : Overall : 4.04 / 4.3  
Courses: Algorithm, Operating System, Machine Learning, Computer Vision, Digital Signal Processing, Game Programming
- National Chiao Tung University (NCTU)**  
Bachelor of Mechanical Engineering  
2015.9 - 2019.1 (Early Graduation)  
GPA : Overall 3.92 / 4.3 ; Last 60 Credits : 4.18 / 4.3  
Courses: Microcomputer, Image Processing, Robotics

## Internship

- URsrobot**  
Industry-Academia Collaboration  
2019.10 - 2021.07 (Taipei, Taiwan)
  - Developed an Obstacle Avoidance System for outdoor robot (mower) using Boustrophedon motions and the Rapid Voronoi diagram combined with Feedback Coverage Path Planning algorithm (Python) based on GPS, IMU, Odometry on Robot Operating System (ROS)
  - Experimented more than 227 cases, including National Theater, Daan Forest Park, and Juming Museum.
  - Achieved 3x quicker on computation time and 1.2x more efficient compared to the existing solution from international journal (BA\*, BCD, TWPS)
- Syntec**  
2017.07 (Hsinchu, Taiwan)  
2017.08 (Suzhou, China)
  - Implemented a production line automation project based on PLC, MACRO, eHMI for workpiece shipment inspection
  - Distributed cable for robot arm, three-axis measuring machine and Computer Numerical Control (CNC)

## Employment History

- Galaxy Software Services**  
Assistant Programming Engineer  
2019.01 - 2019.05 (Taipei, Taiwan)
  - Constructed the website form and developed UI/UX based on Javascript(jquery), Angular, java, kendo, bootstrap
  - Finished the basic function, Create, Read, Update, and Delete (CRUD) through Ajax

## Skill

Web	HTML, Javascript, CSS, Angular, jQuery
Platforms	Linux(Ubuntu), Git
Software	Python, Matlab, C/C++/C#, Java
CAD	Solidworks, Autocad
